Mixing and Storage

Different fertiliser products have the potential to be incompatible. Rinse tanks and application systems thoroughly with water when changing from one product to another. For advice regarding storage and application systems contact your local Yara Australia representative.

Compatibility

Compatibility or suitability of co-application with pesticides should be checked with the pesticide manufacture.

Custom Blends

Yara Australia has an extensive range of N, P, K, Ca and S products and blends some of which contain essential micronutrients. If we don't have the blend you are looking for we can make a custom blend to match your specific crop requirements (2000L mimimum volume).

While Yara Australia has taken all reasonable care in the preparation of this Technical Sheet, the information is a guide only; and should not be relied upon as a substitute for you seeking professional advice in relation to the use of Yara Australia products. It is advised that potential users read the products Material Safety Data Sheet prior to using the product, which is available on request from Yara Australia. Fertiliser may burn and/or damage the crop and affect the health of grazing animals. Avoid direct ingestion by livestock.

Because local climatic and soil conditions, application methods, irrigation, agricultural and grazing management practices are beyond the control of Yara Australia and cannot be foreseen, Yara Australia accepts no responsibility whatsoever for any damage, loss or other result of any nature whatsoever following the use of this product whether used in accordance with the instructions or not. There are no warranties, express or implied by operation of law or otherwise, including but not limited to any warranty as to merchantability or fitness for any particular purpose
